ABOUT ME

Programmer by passion and Bioanalyst by choice. I come from the world of science and research, reconverted to this exciting world of programming.

Initially, I focused on languages related to frontend development, but my innate curiosity for software development prompted me to continue my studies in the training cycle that I am currently pursuing. I like teamwork, I enjoy challenges, I adapt to changes easily and I learn from them.

EXPERIENCE

Junior Frontend Developer

HeyTrade

📅 2022 – 2023   📍 Madrid, Remote

- I collaborated in the development of the web and mobile investment platform.
- Programmed new components in React for the web application.
- Make slight changes to the mobile application, such as creating new modal windows.
- I worked on the creation and correction of styles using the BEM methodology.
- Manage translations, import images and update color palettes from Figma.
- I updated the data in the MockServer for the simulation in the local environment.

JavaScript TypeScript React SCSS NodeJS

Web developer

Sopra HR Software
